Alaris Passport Flatbed Accessory

Passport scanning streamlined — careful, fast, and hassle-free

The ideal partner for your Alaris S2000 Series Scanner. Scan two passport pages at once in seconds. No document handling required and it never has to leave the sight of its owner.

A professional passport-scanning experience

The Alaris S2000 Series Scanners are fully integrated with the Alaris Passport Flatbed Accessory for outstanding ease of use. There is no safer way to scan passports, small, thick or fragile documents.

Just place the passport directly onto the platen to trigger scanning. No sleeve or forcing required. Complete a passport photo-page scan in as little as two seconds – or two pages in about three seconds – at 300 dpi. Capture at up to 24-bit, 1200 dpi resolution.

Reliable performance for peace of mind

Along with no danger of passport damage, these valuable documents are always in view during scanning, adding peace of mind for you and your customers. Scan and return the passport in one efficient step.

Features designed for efficient operation

With the Passport Flatbed Accessory, you don't need another power cord, or USB port on your host PC. Thanks to seamless TWAIN and ISIS-driver integration with the S2000 Series Scanners, there's no need to use multiple scanner drivers. Scanned customer onboarding documents can be mixed with images from the passport flatbed as required.

Space-saving design

The Alaris Passport Flatbed Accessory docks underneath the scanner, for a more compact footprint that takes up less desk space.

Single-touch simplicity

The Alaris Passport Flatbed Accessory integrates smoothly and conveniently into your workflow. Scan at the touch of a button with Alaris Info Input Express Limited Edition Software. It integrates with the Passport Flatbed Accessory and the S2000 Series Scanners to extract data, and drive digital transformation. Convenient push and pull scanning options allow scanning from, and sending images to, business applications.

Be ready for passports and more

With the Alaris Passport Flatbed Accessory, you're set to handle passports and other small or delicate documents.

Alaris IN2 Ecosystem
